**Crawford Station Manufactured Gas Plant
 Parcel L
 Chicago, Illinois
 Weekly Field Progress Report**

Report Date: March 24, 2014

Prepared By: Natural Resource Technology, Inc. (NRT)

Submitted To: Integrys Business Support, LLC (IBS)

Activity Period: March 9, 2014 through March 15, 2014

Active Parties: Burns & McDonnell, Tecnica Environmental Services, Waste Management, Marina Transport

The following summarizes the environmental field activities performed by NRT on behalf of IBS at the former Crawford Station manufactured gas plant (MGP) Time Critical Removal Action (AOC V-W-11-C-981):

Tasks	Environmental Activities
General Description of Work Performed	<p>The following activities were conducted during the course of the week.</p> <ul style="list-style-type: none"> ▪ Excavation activities were conducted at Area 5S continued. ▪ No trucks were loaded on Wednesday, 3/12/2014 due to overnight snow accumulation. Tecnica was onsite to continue breakdown of concrete structures and perform snow removal. ▪ Excavated materials were transported to Waste Management's Laraway Road RDF landfill in Elmwood, Illinois. A total of 7,767.68 tons (403 loads) of excavated material were removed over the course of this week. A total of 543,865.93 tons (28,344 loads) of excavated material has been removed and disposed of during the Parcel L Time Critical Removal Action. ▪ Continuous on-site perimeter air monitoring as defined in the RAWP was provided by NRT. In addition to the continuous perimeter air monitoring, a series of 24-hour air samples were collected for laboratory analysis. ▪ No backfilling occurred this week. ▪ Wastewater was pumped from the excavations to the Wastewater Treatment System (WWTS) before discharge to an approved MWRD sewer. ▪ Utilized GPS unit to locate pertinent features and sampling locations.
Sampling Activities Performed	<p>The following sampling activities were conducted during the course of the week:</p> <ul style="list-style-type: none"> ▪ A total of 10 SUMMA canister air samples (140311001-140311005), and 10 PUF air samples (140311006-140311010 and 140312001-140312005)

Tasks	Environmental Activities
Sampling Activities Performed (cont.)	<p>were collected and submitted to Test America Laboratories for BTEX/Naphthalene and select PAH analyses, respectively. An additional sampling event was deployed on 3/12/2014 due to three of the 3/11/2014 samples due a power failure overnight.</p> <ul style="list-style-type: none"> ▪ Three post excavation soil samples (140311011-140311013) were collected from the base of Area 5 and submitted to Text America Laboratories for analysis. ▪ One amended soil sample (140313006) was collected from material excavated near former valve house on the southeast corner of the gas relief holder in Area 5S. The sample was submitted to Test America Laboratories for benzene analysis.
Equipment Deployed	<p>PUF sampling systems SUMMA canisters with 24-hour flow regulators AirLogics Air Monitoring Stations Photo ionization detectors (PIDs) GPS handheld unit Hand auger and shovels</p>
Field Photos	See Field Photos below

Additional Site Activities:

- Concrete and metal debris from former MGP structures at Area 5S were continuously broken down for disposal or future on-site use.
- A former valve house was exposed at the southeast corner of the gas relief holder in Area 5S. Apparent source material was amended with woodchips and bed ash and sampled for landfill approval criteria before disposal.

Work planned for the coming week, March 16, 2014 through March 22, 2014, is as follows:

- Continue excavating Area 5S.
- Continue pumping wastewater from excavations as needed and weather permitting.
- Continue removal and breakdown of concrete and metal debris from site excavations.
- Provide continuous perimeter air monitoring of the site, and take air samples as described in the Parcel L RAWP.
- Review sampling data received from laboratories that provided analyses, and apply this data in providing environmental oversight.

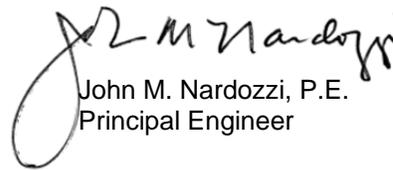

A weekly field progress report will continue to be issued throughout the duration of field activities for this Time Critical Removal Action

Please feel free to contact us if you have any questions.
Sincerely,

NATURAL RESOURCE TECHNOLOGY, INC.

Timothy B. Norris, P.G.
Geologist

John M. Nardozi, P.E.
Principal Engineer
