1.1.2 Site Description

A mixed rural, residential and industrial area with a currently unknown number of residential wells affected.

1.1.2.1 Location

Privately owned residential homes in Wedron, LaSalle County, Illinois

1.1.2.2 Description of Threat

The chemical constituents that have been identified include: Benzene, Ethyl Benzene ,Toluene and Napthalene

1.1.3 Preliminary Removal Assessment/Removal Site Inspection Results

U.S. EPA was referred this ground water contamination site by IEPA Bruce Everetts in December of 2011.

Two homes had been identified in a sampling effort by IEPA and IDPH in November 10, 2011 with benzene levels above the drinking water standard.

2. Current Activities

2.1 Operations Section

2.1.1 Narrative

U.S. EPA and START collected two private well samples on December 14, 2012 at the referral locations. The samples both came back with levels of Benzene over the Maximum Concentration level (MCL) which is also the Removal action level. These two residents are currently being provided bottled water.

2.1.2 Response Actions to Date

U.S. EPA and START collected two additional private well samples on Jan 30, 2012. It is expected that at least one of these homes will need bottled water. More residents may be impacted based on this last sampling event.

2.1.3 Enforcement Activities, Identity of Potentially Responsible Parties (PRPs)

- 1) Doyle Hoxley Site (IEPA site)
- 2) Former Junk Yard one block from the site
- 3) Burlington Northern Train Derailment (happened many years ago 2 blocks from site- fuel was lost)
- 4) Wedron Silica Plant and silica mining operations
- 5) Former Go-Cart Manufacturing facility 3466 E. 2062 Rd Wedron, Illinois

2.2 Planning Section

2.2.1 Anticipated Activities

Preparation of an Action Memorandum to fund an alternate water supply for affected residents. Conduct ground water investigation to determine source of contamination.

2.2.1.1 Planned Response Activities

Additional residential well sampling at homes in town to better define the affected area. Conduct ground water investigation in Wedron to determine the source of the contamination.

2.2.1.2 Next Steps

Prepare Action Memorandum to provide an alternate water supply for the affected area. One option includes a deeper well as a source for residential water supply. Also, whole house carbon and air stripping treatment units to remove the Volatile Organic compounds could be utilized.
