

NPDES authorization to discharge to waters of the United States, Permit No. TX124648
 The applicant's mailing address is:

Clean Energy Texas LNG
 12114 Longstreet Road
 Willis, TX 77318

The discharges from this facility are as described in the table below:

Outfall Reference Number	Discharge Coordinates Latitude Deg° Min' Sec" Longitude Deg° Min' Sec"	Type of Discharge	Discharge Volume MGD	Receiving Water	Water Body Segment
001	30° 26' 79" N 95° 31' 26" W	Wastewater discharges are from non contact cooling water, aerobic septic system, and stormwater	0.0037 MGD	An unnamed drainage to Lewisville Creek Reservoir, an unclassified water in the San Jacinto River Basin	Lake Conroe in Segment 1012 of San Jacinto River Basin

The proposed changes from the previous permit are:

1. TRC limit of 33µg/L is changed to a limit of 11µg/L, which is EPA's chronic chlorine criterion.
2. Updates have been made to the Class I and Class II penalty amounts in Part III.E.3 of the final permit.
3. Electronic DMR reporting requirements have been included in the proposed permit.
4. WET limit has been established in the draft permit based on failure to report WET test results during the last permit cycle.
5. Fecal Coliform limit is replaced with E. coli bacteria limit in the draft permit based on the current Texas Water Quality Standards.

This is a renewal of an existing permit and EPA proposes that this permit be reissued. A Statement of Basis is available, and describes the rationale for permit conditions. Under the SIC Code 1321, the applicant is engaged in the production and transportation of Liquid Natural Gas.
