Location: City of  
Albuquerque Convention  
Center, Taos Room  
401 2nd St NW  
Albuquerque, NM 87102

EPA is inviting you to participate in one of the three post-construction stormwater workshops being held in Las Cruces, Aztec, and Albuquerque, NM, during the dates and locations listed above. Implementation of Green Infrastructure and Low Impact Development practices are an important tool for protecting water quality and useful in meeting post-construction runoff control requirements in MS4 permits across the country.

The goal of the workshops is to educate municipal staff and engineers on how to design sites to mimic predevelopment conditions. The workshops will include case studies of projects that have implemented stormwater controls in arid and semi-arid areas. The workshops will also present the analysis carried out in a Middle Rio Grande Predevelopment Hydrology Study. See additional information on this study at

[http://epa.gov/region6/water/npdes/sw/ms4/nfs\\_albuquerque\\_report\\_april2014\\_v2.pdf](http://epa.gov/region6/water/npdes/sw/ms4/nfs_albuquerque_report_april2014_v2.pdf)

The workshops are open to MS4s, developers, State and Federal regulators, and other stormwater practitioners involved with the municipal stormwater program. The workshops will be at no cost, but due to limited space, attendees need to register using the following website:

<http://water.epa.gov/polwaste/npdes/NPDES-Training-Courses-and-Workshops.cfm>
