SUPPLEMENTARY INFORMATION:

A. General Information

This permit authorizes stormwater discharges to waters of the United States from small MS4s within the State of New Mexico except MS4s located in Indian lands, Los Alamos County, the Middle Rio Grande Sub-Watersheds described in Appendix A of the NPDES permit No NMR04A000, or within the

area of another MS4 permit provided the MS4 is located fully or partially within an urbanized area as determined by the 2000 and 2010 Decennial Census; is designated as a regulated MS4 pursuant to 40 CFR 122.32; or this permit may also authorize an operator of a MS4 covered by this permit for discharges from areas of a regulated small MS4 located outside an Urbanized Areas or areas designated by the Director provided the permittee complies with all permit conditions in all areas covered under the permit. Maps of 2010 Census urbanized areas are available online at: <http://water.epa.gov/polwaste/npdes/stormwater/Urbanized-Area-Maps-for-NPDES-MS4-Phase-II-Stormwater-Permits.cfm>.

At the time the general permit NMR040000 was issued, permit coverage was actually provided by three legally separate and distinctly numbered permits (NMR040000, NMR04000I, OKR04000I). NMR04000I was issued for MS4s on Indian Country in New Mexico, general permit OKR04000I was issued for MS4s on Indian Country lands in Oklahoma. MS4 General Permit OKR04000I expired June 30, 2012, without any MS4s submitting a Notice of Intent to be covered. Since no MS4 operators took advantage of the authorization offered by that permit during its five year term and there are no administratively continued permittees covered by the permit, EPA Region 6 considers the permit terminated as of the expiration date and is not proposing to reissue MS4 General Permit OKR04000I at this time. Any MS4 operators on Indian Country lands in Oklahoma requiring permit coverage should contact EPA Region 6 for information on how to obtain permit coverage.

B. Statutory and Regulatory History

The overall intent of the permit conditions is to support the statutory goals of Section 101 of the Clean Water Act (CWA) to restore and maintain the chemical, physical and biological integrity for the Nation's waters. The 1987 Water Quality Act (WQA) amended the CWA by adding section 402(p) which requires that NPDES permits be issued for various categories of storm water discharges. Section 402(p)(2) requires permits for five categories of storm water discharges, commonly referred to as Phase I of the NPDES Storm Water Program. Included in Phase I are discharges from large municipal separate storm sewer systems (MS4s) (systems serving a population of 250,000 or more). Phase I regulations published November 16, 1990 (55 FR

47990) addressed discharges from large MS4s.

Section 402(p)(6) of the CWA requires permitting for certain additional storm water discharges (Phase II of the storm water program) to protect water quality. EPA promulgated final Phase II storm water regulations on December 8, 1999 (64 FR 68722). These regulations set forth the additional categories of discharges to be permitted and the requirements of the program. The additional discharges to be permitted included small MS4s located in Urbanized Areas designated by the Bureau of the Census and those designated by the Director on a case-by-case basis to protect water quality. This proposed permit offers coverage to Phase II regulated MS4s in the Farmington, Santa Fe, Los Lunas, Las Cruces, and El Paso UAs into a single general permit.

The discharge control conditions established by this permit are based on Section 402(p)(3)(B) of the Act which mandates that a permit for discharges from Phase II MS4s must effectively prohibit the discharge of non-stormwater to the MS4 and require controls to reduce pollutants in discharges from the MS4 to the maximum extent practicable (MEP) including management practices, control techniques and system design and engineering methods, and such other provisions as the Administrator deems appropriate for the control of pollutants. MS4 permits requiring implementation of Best Management Practices (BMPs) addressing the Six Minimum Control Measures at 40 CFR 122.34(b) are generally deemed to be an appropriate means of meeting the MEP standard. Protection of water quality and compliance with Total Maximum Daily Loads (TMDLs) are addressed through the CWA 402(p)(3)(B)(iii) authority for "other such provisions as the Administrator deems appropriate for the control of pollutants."

Paperwork Reduction Act

The information collection required by this permit will reduce paperwork significantly by implementation of electronic reporting requirements. EPA is working on an electronic notice of intent (eNOI) system so applicants will file their NOIs online. EPA estimates that it takes 10 to 15 minutes to fill up all information required by eNOI for each lease block. And it takes much less time to add, delete, or modify eNOI. EPA will also incorporate an electronic discharge monitoring report (NetDMR) requirement in the permit. The time for NetDMR preparation will be much less than that for paper DMR. The electronic

filing systems will also significantly reduce the mailing cost.

Regulatory Flexibility Act

The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, requires that EPA prepare a regulatory flexibility analysis for regulations that have a significant impact on a substantial number of small entities. As indicated below, the permit reissuance proposed today is not a "rule" subject to the Regulatory Flexibility Act.

Dated: July 20, 2015.

Director, Water Quality Protection Division, EPA Region 6.
