

DESIGNATIONS IN US EPA REGION 9 FOR THE
2010 PRIMARY 1-HOUR SULFUR DIOXIDE (SO₂)
NATIONAL AMBIENT AIR QUALITY STANDARDS

-  Nonattainment
-  Areas being addressed in separate future actions*

The primary national ambient air quality standard (NAAQS) for 1-hour sulfur dioxide (SO₂) is 75 parts per billion (ppb). Air quality monitors in each area designated 'Nonattainment' have measured violations of the SO₂ NAAQS.

*Includes Commonwealth of Northern Mariana Islands and American Samoa (not shown on this map).
