US EPA REGION 9 AIR QUALITY TRENDS, 1970-2017
ANNUAL NITROGEN DIOXIDE (NO\(_2\)) DESIGN VALUE CONCENTRATIONS BY DESIGNATED AREA

The 1971 primary national ambient air quality standards (NAAQS) for annual NO\(_2\) is 53 parts per billion (ppb). The annual primary standard NO\(_2\) design value for a site is the valid annual mean recorded value. For annual NO\(_2\) design values, X-axis labels represent the design value year. All exceptional event data (e.g., high winds and wildfires) that EPA has concurred on have been excluded from design value calculations.
