Introduction

Administrative Record Index

U.S. EPA Modification of Approval for Commercial Storage and Disposal of PCBs at US Ecology Nevada, Inc.

The Administrative Record (“AR”) Index (“Index”) lists all of the documents, correspondence, data and other information that U.S. EPA considered in proposing to modify the Toxic Substances Control Act (“TSCA”) Approval (“TSCA Approval”) for the US Ecology Nevada, Inc. Beatty Nevada Facility (“Facility”). The TSCA Approval, which was initially issued on November 5, 2012, allows US Ecology to manage wastes containing polychlorinated biphenyls (PCBs) at the Facility. If approved, the proposed modification will allow US Ecology to construct and operate a new 47.3-acre landfill for disposal of PCB wastes at the Facility.

The AR is physically located at the U.S. EPA Region 9 office in San Francisco, California. Copies of the most pertinent documents used in the decision making process and the Index are located in satellite information repositories at the Beatty Library, the Nevada Division of Environmental Protection (“NDEP”) office in Las Vegas, Nevada and online at: www.epa.gov/region9/pcbs/usecology/. If you wish to view a document listed in the Index that cannot be found online, at the Beatty Public Library or NDEP Office, please call Ronald Leach at (415) 972-3362 or send an E-mail request to leach.ronald@epa.gov and a copy will be made available.
