MEMORANDUM

SUBJECT: Healy Clean Coal Project Visibility Analysis

FROM: Robert B. Wilson *Rob*
Regional Meteorologist

TO: Jawad Touma
SRAB/OAQPS, RTP (MD-14)

Marc Pitchford
EMSL/ORD, Las Vegas

I previously sent both of you a copy of "Permit Application for Air Quality Program - Prevention of Significant Deterioration (PSD) and Air Quality Control - Permit to Operate," for the Healy, Alaska Clean Coal Project, in three volumes, and dated April 1992. Please review the visibility analysis documented in Section 7.5, Volume I, and Appendix I, Volume III.

In particular, evaluate the appropriateness of the technical modifications and assumptions made by the applicant in their use of the PLUVUE visibility model. Do you believe this is a technically adequate characterization of the visibility impairment expected to result from the proposed project?

Please provide your written review comments to me by August 7, 1992. Call me if you have any questions, and thanks in advance for your assistance.
