Annamaria:

I don't think it is necessary for Clearinghouse concurrence unless you would like to have it in support of your position. However, I'm not sure I quite understand what you are asking Lovett to do regarding the met data and model performance. Are you saying that if a new model performance evaluation is made and found acceptable that they can use the met data from the original performance evaluation for the PSD study? Or are you saying they need to do additional met monitoring to get the minimum data requirements for CTDM+ application provided another performance evaluation is made?  
Thanks. DD
