**Subject:** Minutes of STORET Change Control Board (CCB) Meeting

## 1.0 Purpose

A CCB Meeting was held on December 12, 2002 at the Systems Development Center (SDC). The purpose of the meeting was to review and address the status of the STORET data warehouse and STORET v2.0 activities, and discuss STORET interaction with the Beaches initiatives.

## 2.0 Attendees

### SDC

Ernestine Bryant  
Stephen Smith  
Joe Wilson

### EPA

Robert King (TOPO)  
Lee Manning (ATOPO)  
Charles Kovach  
Kevin Christian

Representatives from INDUS were also present for the discussions relating to the Beaches program.

## 3.0 Discussion Topics

The following sections detail the discussions of the project tasks.

### 3.1 Administrative Items

A full system test of STORET v2.0 will be performed at the SDC on December 17-18, 2002.

### **3.2 Central Warehouse**

The Central Warehouse portion of the meeting focused on long-term planning for the integration of the Central Warehouse with other applications (such as Beaches and Enviromapper) and strategies for spatially enabling the Central Warehouse.

It was proposed that Project IDs be used to associate Stations and Monitoring Activities with specific beaches. This would allow for the retrieval of all Beach Program monitoring data associated with a Beach by the selection of a single parameter (i.e., Project). All Beach data will also be associated with the National Beach Program Project ID to facilitate rapid data retrieval at the national level. This National Beach Program Project ID can be associated to all Beach program monitoring activities across all Beaches.

EPA will research the possibility of creating new Beach IDs that conform to the 8-character limit enforced by the current STORET data model for Projects. In addition, options for spatially enabling the Central Warehouse will be further explored by EPA and discussed during future meetings.

### **3.3 Data Entry Module**

A new set of reference tables is available as fix012 on the STORET Web Site. The Project Team was asked to assemble a new reference table package that included fix012.

The procedure for installation and the checkpoints performed by the software were reviewed. The following changes to the installation were made:

- C Include a couple sentences on how to create an Oracle Home in the installation instructions.
- C Put the instructions for loading the Report Module first in the sequence for installation.
- C Add logic to skip the various checks run by the software, and perform the data import if a dump file exists in a given location. This will assist STORET user support in helping users migrate data when complications in unforeseen and future configurations of hardware and operating systems arise.
