Preparation of the 2005 National Emissions Inventory

Regi Oommen
Eastern Research Group, Inc.

2009 EI Conference
Baltimore, MD
April 15, 2009
Acknowledgments

☐ Co-authors:
  - Anne Pope, U.S. EPA
  - Darcy Wilson, ERG

☐ Other ERG Staff:
  - Stacie Enoch
  - Robin Weyl
  - Steve Mendenhall
  - Heather Perez
  - Karla Faught
  - Jody Tisano
Overview of Presentation

☐ Compilation of the inventory
☐ Updates since June 2008 EI Conference
☐ Example uses of the 2005 NEI
☐ Wrap-Up
Compilation of the Inventory

- Pollutants Include:
  - Criteria air pollutants (CAPs)
  - Hazardous air pollutants (HAPs)

- Source Types Include:
  - Large stationary (e.g. petroleum refineries)
  - Small stationary (e.g. gas stations)

- Geographic Coverage Includes:
  - Entire United States
  - Puerto Rico and Virgin Islands
Data Sources

- State/Local/Tribal (SLT) Agency data submittals
  - 48 State Agencies (including D.C. and Puerto Rico)
  - 19 Local Agencies
  - 4 Tribal Agencies

- Risk and Technology Review (RTR) data
  - 54 MACTs reviewed

- EPA Emission Inventory and Analysis Group (EIAG) data (EGUs, Airports, misc.)
Data Sources (cont.)

- Sector Policies and Program Division (SPPD) data
- Regional Planning Organization (RPO) data
- Toxic Release Inventory (TRI)
- Version 3 of the 2002 NEI
- Gulf of Mexico Oil and Gas Platform data from MMS
Timeline

- Spring 2007: 2005 NEI, V1 prepared
- Summer/Fall 2007: Data Gathering/QA
- May 2008: 2005 NEI, V2 draft
- Summer 2008: EIAG review
- October 2008: 2005 NEI, V2 final delivered
- Spring 2009: 2005 NEI, V3 draft
- Summer/Fall 2009: 2005 NEI, V3 final
Version 2 Updates Since May 2008

- Incorporated additional RTR data
- Incorporated revisions due to lead NAAQS revision
- PM Augmentation
- Emissions, facility, and locational corrections after EIAG review.
- Emissions, facility, and facility status corrections after GHG ANPRM activities
Version 3 Updates Since October 2008

- Incorporated additional RTR data
- Incorporated revisions due to lead NAAQS revision
- Boiler HAP Augmentation
- Additional reconciliation of facilities (NEI Site ID) and pollutants
- Revisions to emissions, locations, and facility status due to Schools Monitoring Study
Version 3 Updates Since October 2008 (cont.)

- Area Sources category assignments
- BART Facility tags (based on RPO data)
- Additional NATA02 updates
- Assignment/Identification of biorefineries
- Additional data fields in NOF include: Emission Process Group, Facility Category Flag, and Closed Year.
- Identification of closed landfills and year
Upcoming Tasks

- Preparation for NATA05
- Additional revisions due to lead NAAQS revision
- Landfills emissions adjustment
- RTR Form Files
- Additional RTR revisions (Group 2 and 3)
- Source Sector Updates
  - Pulp and Paper
  - Portland Cement
## Comparisons – 2002 and 2005

<table>
<thead>
<tr>
<th>Parameter</th>
<th>2005 NEI</th>
<th>2002 NEI</th>
</tr>
</thead>
<tbody>
<tr>
<td>Annual emission records</td>
<td>4.7 million</td>
<td>3.5 million</td>
</tr>
<tr>
<td># Unique Facilities</td>
<td>&gt;101,600</td>
<td>&gt;85,000</td>
</tr>
<tr>
<td># Tribal Areas</td>
<td>23</td>
<td>15</td>
</tr>
<tr>
<td># U.S. Counties</td>
<td>3,108</td>
<td>3,027</td>
</tr>
<tr>
<td># Gulf of Mexico OCS Areas</td>
<td>1,079</td>
<td>0</td>
</tr>
</tbody>
</table>
Comparisons – 2002 and 2005 (cont.)

<table>
<thead>
<tr>
<th>Parameter</th>
<th>2005 NEI</th>
<th>2002 NEI</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total CO emissions (tpy)</td>
<td>3,987,864</td>
<td>3,833,574</td>
</tr>
<tr>
<td>Total NH3 emissions (tpy)</td>
<td>181,502</td>
<td>184,884</td>
</tr>
<tr>
<td>Total NO\textsubscript{x} emissions (tpy)</td>
<td>6,168,911</td>
<td>7,080,750</td>
</tr>
<tr>
<td>Total PM\textsubscript{10}-PRI emissions (tpy)</td>
<td>1,306,002</td>
<td>1,233,399</td>
</tr>
<tr>
<td>Total PM\textsubscript{2.5}-PRI emissions (tpy)</td>
<td>953,775*</td>
<td>883,449</td>
</tr>
<tr>
<td>Total SO\textsubscript{2} emission (tpy)</td>
<td>12,502,152</td>
<td>12,637,803</td>
</tr>
<tr>
<td>Total VOC emissions (tpy)</td>
<td>1,490,170</td>
<td>1,472,238</td>
</tr>
<tr>
<td>Total HAP emissions (tpy)</td>
<td>886,473</td>
<td>910,620</td>
</tr>
</tbody>
</table>

* Prior to PM Augmentation, PM\textsubscript{2.5}-PRI emissions were 255,630 tpy
Example Uses of the 2005 NEI

- **Modeling:**
  - NATA05
  - IPM

- **Ambient Monitoring:**
  - Lead NAAQS revision
  - School Monitoring
  - ATSDR Exposure Investigations
Example Uses of the 2005 NEI (cont.)

☐ Accountability:
  ■ Toxicity-weighting (e.g., MACT standards);
  ■ Comparisons to ambient monitoring (mass and toxicity-weighted)

☐ Communication:
  ■ EPA’s “Report on the Environment”
  ■ EPA’s “Where You Live”
    http://www.epa.gov/air/emissions/where.htm
Example Uses of the 2005 NEI (cont.)

- **Rulemaking:**
  - Used to gather baseline emissions
  - Backend data for RTR Forms

- **Climate Change:**
  - Update Landfills Methane Outreach Program (LMOP);
    identify potential partners
  - GHG Reporting Rulemaking Process
Example Uses of the 2005 NEI (cont.)

- **Enforcement:**
  - New Source Review determinations
  - MACT Notifiers
  - BART determinations
Enforcement Example

- EPA’s Region 10 Office was interested in identifying facilities that were increasing in emissions over the last 10 years, and that qualify as major for NSR.

- Data Sources:
  - 2005 NEI
  - 2002 NEI
  - 1999 NEI
  - 1996 WRAP
NSR “major” sources by pollutant (CO, NO\textsubscript{x}, PM\textsubscript{10}-PRI, PM\textsubscript{2.5}-PRI, SO\textsubscript{2}, or VOC) defined by:

- Pollutant emissions $>100$ tpy PTE if subject to at least 1 of the 26 source categories listed in 40 CFR 52.21. Includes fugitive emissions; or
- Pollutant emissions $>250$ tpy PTE if not subject to 1 of the 26 categories listed in 40 CFR 52.21. Applicable to stack emissions only (fugitive emissions not counted).

Other requirements (e.g., ozone nonattainment status, etc.)
## Major Stationary Sources Identified in 40 CFR 52.21

<table>
<thead>
<tr>
<th>Major Stationary Sources</th>
<th>Source Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fossil-fuel fired steam electric plants of &gt; 250 MMBTU/hr</td>
<td>Coke Oven Batteries</td>
</tr>
<tr>
<td>Coal Cleaning Plants (with thermal dryers)</td>
<td>Sulfur Recovery Plants</td>
</tr>
<tr>
<td>Kraft Pulp Mills</td>
<td>Carbon Black Plants</td>
</tr>
<tr>
<td>Portland Cement Plants</td>
<td>Primary Lead Sources</td>
</tr>
<tr>
<td>Primary Zinc Smelters</td>
<td>Fuel Conversion Plants</td>
</tr>
<tr>
<td>Iron and Steel Mills</td>
<td>Sintering Plants</td>
</tr>
<tr>
<td>Primary Aluminum Ore Reduction Plants</td>
<td>Secondary Metal Production Facilities</td>
</tr>
<tr>
<td>Primary Copper Smelters</td>
<td>Chemical Process Plants</td>
</tr>
<tr>
<td>Municipal Incinerators capable of charging &gt;50 tons of refuse/day</td>
<td>Fossil-fuel Boilers of &gt; 250 MMBTU/hr</td>
</tr>
<tr>
<td>Hydrofluoric, Sulfuric, and Nitric Acid Plants*</td>
<td>Petroleum Storage and Transfer Facilities with capacity exceeding 300,000 barrels</td>
</tr>
<tr>
<td>Petroleum Refineries</td>
<td>Taconite Ore Processing Facilities</td>
</tr>
<tr>
<td>Lime Plants</td>
<td>Glass Fiber Processing Plants</td>
</tr>
<tr>
<td>Phosphate Rock Processing Plants</td>
<td>Charcoal Production Facilities</td>
</tr>
</tbody>
</table>

* Often split into 3 distinct categories
Version 2 of the 2005 NEI was used to first identify facilities in the Region 10 states.

SCCs subject to the 26 categories listed in 40 CFR 52.21 were identified.

Using the EM, EP, ER, and SI tables:
- SI: Facility Name, NEI Site ID, Location Address
- EP: SCC
- ER: Emission Release Point Type (stack or fugitive)
- EM: Emissions data
Multi-step process identifying facilities, keeping in mind the respective requirements.

Identified facilities were applied to the 2002 NEI, 1999 NEI, and 1996 WRAP inventories:

- Matchup issues (e.g., no NEI ID in 1996 WRAP)
- Once resolved, criteria pollutant emissions data pulled
- Comparisons across all four baseyears to identify an increasing trend.
- Note: actual emissions in NEI, not PTE
Enforcement Example (cont.)

- $SO_2$ emissions from Tesoro Northwest Company in Anacortes, WA
  - 1996: 3,138 tpy
  - 1999: 4,809 tpy
  - 2002: 5,345 tpy
  - 2005: 5,575 tpy

- Region 10 can use the results of this work to potentially identify sources for permit reviews
Wrap-Up

- Version 2 of the 2005 NEI was finalized in October 2005.

- Some improvements to the 2005 NEI include:
  - Incorporation of MMS platform data
  - Increased number of facilities
  - Identification of closed landfills
  - Better locational coordinates (no county-centroids!)
  - Identification of sources near schools
  - BART facilities assigned
