Subjects Discussed: I asked Mr. Roy whether the material they transmitted on August 18, 1989, contained any confidential information. Mr. Roy said that it did not. Mr. Roy indicated that the 0.037 kg TOC per Mg of product rate was due to a spray condenser on the esterifier, but before additional control. Even though they may be meeting the proposed standard, Mr. Roy felt their comment was still relevant because of the apparent discrepancy in the BID and the proposed standards. Mr. Roy said that if there are any questions on the transmitted material, to call Debbie Parnell.
