Category: 32 - 111(d)

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
Office of Air Quality Planning and Standards
Research Triangle Park, North Carolina 27711

DATE: August 7, 1981

SUBJECT: Working Group Meeting - Review of 111(d) Guidelines to Control Trichloroethylene, Perchloroethylene, 1,1,1-Trichloroethane, Methylene Chloride and Trichlorotrifluoroethane from Existing Organic Solvent Cleaners

FROM: Don R. Goodwin, Director
Emission Standards and Engineering Division (MD-13)

TO: See Below

Attached for your review are a draft of the 111(d) guideline document and a copy of the guidelines and compliance times for existing organic solvent cleaners using the halogenated solvents cited above. Attached to the proposed guidelines is a portion of the organic solvent cleaner NSPS containing relevant definitions. Please note that Chapter 5 of the guideline document, the health effects summary, is not in the package and will not be incorporated until after the Science Advisory Board (SAB) meets in November to review the health effects documents for the solvents. However, the absence of Chapter 5 will not affect your review of the technical and economic aspects of the guideline package. The package will be sent on to the Steering Committee only after the SAB review and after consideration of the SAB comments.

Also, note that Subpart C and 40 CFR Part 60 has been recodified to include the guidelines for organic solvent cleaners. Because of this recodification, the guidelines for sulfuric acid mist are also included in this package but are not for review.

We have tentatively set September 3, 1981, for the Working Group meeting; however, we do not plan to hold it unless a member of the Working Group requests it. I would appreciate your sending me any comments you might have on the package by August 21. If we decide to have the meeting, I will inform you on August 25.

Don R. Goodwin
