information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and disclosing information; and adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities potentially affected by this ICR include individuals or entities engaged in activities related to the registration of a pesticide product, which may be identified by the North American Industrial Classification System (NAICS) code 325320.

- Estimated Number of Respondents: 103.
- Frequency of Response: As needed.
- Estimated Total Annual Cost: $14,103,722. This ICR does not involve any capital investment or maintenance and operational costs.
- Changes in the Estimates: There is a net decrease of 80,615 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. EPA anticipates that 47 fewer tolerance petitions will be received annually compared to the previous three years (2006, 2007, and 2008). This would result in a corresponding 81,122 hour reduction in estimated annual burden. The change is an adjustment. In addition, EPA estimates that IR-4 petitioners are changing the way in which they compile tolerance petitions for submission to EPA in an effort to capture the new fee waiver incentives under the Pesticide Registration Improvement Renewal Act. This change in IR-4 petition preparation results in an additional 13 hours per response, resulting in a program change increase of 507 hours annually.

General Information
A. What Should I Consider as I Prepare My Comments for EPA?
1. Submitting CBI. Do not submit this information to EPA through http://www.regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.
2. Tips for Preparing Your Comments. When submitting comments, remember to:
   • Identify the rulemaking by docket number and other identifying information (subject heading, Federal Register date and page number).
   • Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
   • Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
   • Describe any assumptions and provide any technical information and/or data that you used.
   • If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
   • Provide specific examples to illustrate your concerns, and suggest alternatives.
   • Make sure to submit your comments by the comment period deadline identified.

SUPPLEMENTARY INFORMATION: Under section 108(a) of the Clean Air Act (CAA), the Administrator identifies and lists certain pollutants which “cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare.” The EPA then issues air quality criteria for these listed pollutants, which are commonly referred to as “criteria pollutants.” The air quality criteria are to “accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air, in varying quantities.” Under section 109 of the CAA, EPA establishes primary (health-based) and secondary (welfare-based) NAAQS for pollutants for which air quality criteria are issued. Section 109(d) of the CAA requires periodic review and, if appropriate, revision of existing air quality criteria. The revised air quality criteria reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. The EPA is also required to periodically review and revise the NAAQS, if appropriate, based on the revised criteria.

Presently, EPA is reviewing the primary (health-based) CO NAAQS for CO. The EPA’s overall plan and schedule for this review is presented in the Integrated Review Plan for the National Ambient Air Quality Standards for Carbon Monoxide.¹ A draft of the integrated review plan was released for public review and comment in March 2008 and was the subject of a consultation with the Clean Air Scientific Advisory Committee (CASAC) on April 8, 2008 (73 FR 12998). Comments received from that consultation and from the public were considered in finalizing the plan and in beginning the review of the air quality criteria.

As part of EPA’s review of the primary (health-based) CO NAAQS, the Agency is conducting quantitative and qualitative assessments characterizing the health risks associated with exposure to ambient CO. The EPA’s plans for conducting these assessments, including the proposed scope and methods of the analyses, were presented in a planning document titled, Carbon
