AND STANDARDS

MEMORANDUM

SUBJECT: AERMOD User's Guide Errata and Resubmission to Docket

FROM: George M. Bridgers, Model Clearinghouse Director
Air Quality Modeling Group (C439-01)

A handwritten signature in black ink that reads "George M. Bridgers".

TO: Final Regulatory Docket No. EPA-HQ-OAR-2015-0310

The AERMOD User's Guide, EPA-454/B-16-011, that was submitted to the final regulatory docket, EPA-HQ-OAR-2015-0310, on December 20, 2016, contained a few errata that were identified prior to publication of the final rule in the Federal Register. A revised version of the AERMOD User's Guide has been uploaded to the docket and has been replaced on the EPA's SCRAM website at the following URL, <https://www.epa.gov/scram/air-quality-dispersion-modeling-preferred-and-recommended-models#aermod>.

Specifically, the identified and corrected errata are as follows:

- Removed references to PVMRM2 in Table B-2 on pages B-5, B-8, and B-11;
- Revised the default lower limit (or minimum ambient ratio) for the ARM2 ambient ratio applied to the modeled NO_x concentrations to 0.5 in Section 3.3.6.3 on page 3-101 and Table B-2 on page B-8; and
- Revised PVMRM and OLM as DFAULT options in Table B-2 on page B-5.

Further questions about these errata or the revised AERMOD User's Guide should be direct to me, (919) 541-5563 or Bridgers.George@epa.gov, or contact the Air Quality Modeling Group Leader, Tyler Fox, (919) 541-5562 or Fox.Tyler@epa.gov.
