

RECORD OF COMMUNICATION

X TELEPHONE CALL MEETING CONFERENCE CALL OTHER

INFORMATION COPIES TO: Dennis

TO: D. Doll, D. Wilson
FROM: A. Colecchia, Region II
DATE: 5/22/97, 6/17/97
TIME:
SUBJ: NJ Proposed Screening Wind Speeds.

SUMMARY OF COMMUNICATION:

Issue: State has proposed eliminating the 20 m/s wind speed from SCREEN3 on the grounds that it does not occur in the State. Region I* disagrees in that 18 m/s winds have been observed and that SCREEN3 is just a screening technique and refinements such as the proposal should really default to refined modeling on a case by case basis. Region II sent the C/H a draft letter to NJ explaining EPA's position. C/H Comment: Agree with Region II**

*This issue was discussed at the 1997 Regional/State/local agency workshop, where several comments similar to the Region II position were noted.

**Final version of Region II letter, dated June 24, 1997 is in C/H file.
