Air & Radiation Branch
U.S. EPA Region V

MEMORANDUM

SUBJECT: Paradise Power Plant
FROM: *Dean A. Wilson*
Dean A. Wilson, Meteorologist
Source Receptor Analysis Branch (MD-14)
TO: Regional Modeling Contact, Regions I-X

The attached memorandum to Region IV was not a normal Model Clearinghouse response since there was no incoming written request for review of a position. However, since the Clearinghouse was involved in preparation of the memorandum and there are a couple of modeling related issues involved, we are treating it as a Clearinghouse response.

The memorandum makes two points relative to modeling:

1. We are not compromising our position relative to the Guideline language on the use of on-site meteorological data. When at least 1 year of on-site data is available, these data should be used in preference to off-site data.

2. Under the new SIP processing reform (54 Federal Register 2214) all SIP actions that involve nonguideline models or deviations from modeling guidance are to be reviewed by Headquarters, with sign-off by the Administrator.

If you have any questions, please contact me.
