

# Ask the AQS Team

# Ask the AQS Team

- Are there any other AQS users experiencing the problem of being logged out while working with AQS (esp users that have upgraded to IE8)?
- How is AQS compatible with IE8?
- What is the best way (ie, report) to pullout PEP (PM2.5) audit data and Lead analytical accuracy data?

# Ask the AQS Team

- How do I know if I have to report QA data on a 6 day vs. 12 day frequency? In other words, how do I know if I have a PSD monitor?
- Can the AQSQA database be made available after the conference?  
This would be extremely helpful for testing prior to running things in AQSPROD.

# Ask the AQS Team

- If I set my datalogger to store peak SO<sub>2</sub> for each hour, what is the parameter code for “peak SO<sub>2</sub>” as an hourly record?
- AQS needs to have the ability to allow more than one user on at a time.

# Ask the AQS Team

- Would it be possible to create a canned report out of 450 that included all data that is required to be certified?

Call it a 450CE and be able to enter the PQAO and the year and it would request all data required to be certified.

Wouldn't this eliminate the multiple reports or the reports that avoid including certain data?
