Discoverer with AQS for New Users

Nick Mangus

Goals for this class

- Become familiar with the mechanics of using Discoverer
- Practice using Discoverer
- Learn about the data in AQS
- Have Fun!

What Can Discoverer Produce?

Data Listing Reports (Tables; Rows of Data)

File Edit Sheet Tools Graph Help

🗞 🗳 🍐 🖓 🖾 I 🗰 🛅 📩 🖬 I 🏦 I 💁 I 🕍 I 🕅 I 🖉 🖄 🖉 I 🔗 🐼

- Cross-Tabulation Reports (Pivot Tables)
- Graphs & Charts

What is Discoverer?

- A <u>business intelligence</u> tool for customizable queries from Oracle Corporation ("OBI")
- A <u>retrieval only</u> tool that works on a relational database
- Key terms
 - The <u>End User Layer</u> is a filter that makes the database more understandable
 - A <u>Business Area</u> is a grouping of similar data related to a common task
 - You should use only "AQS prod"

Data Model for AQS (Overview)

Pollutant Standard IDs

PS_ID	PARAM. CODE	PROMUL. DATE	PRIMARY STD LEVEL	SEC'RY STD LEVEL	ROUND TRUNC IND	SHORT_DESCRIPTION	DESCRIPTION
1	12128	05-Oct-1978	1.500	1.500	2	Lead Quarterly Historical	Original lead standard based on calendar quarterly average.
3	42101	13-Sep-1985	35	35	2	CO 1-hour 1971	Carbon Monoxide 1-hour standard from 1971.
4	42101	13-Sep-1985	9.000	9.000	2	CO 8-hour 1971	Carbon Monoxide 8-hour running average from 1971.
5	42401	22-May-1996		0.500	2	SO2 3-hour 1971	Sulfur Dioxide 3-hour Block Average from 1971.
6	42401	22-May-1996	0.140		2	SO2 24-hour 1971	Sulfur Dioxide 24-hour standard from 1971.
7	42401	22-May-1996	0.030		2	SO2 Annual 1971	Sulfur Dioxide Annual Mean Standard from 1971.
8	42602	19-Jun-1985	0.053	0.053	2	NO2 Annual 1971	Nitrogen Dioxide Annual Mean from 1971.
9	44201	18-Jul-1997	0.120	0.120	2	Ozone 1-hour Daily 2005	Ozone 1-hour Daily Max value based on data complt'ness from 9am to 9pm.
10	44201	18-Jul-1997	0.080	0.080	2	Ozone 8-Hour 1997	Ozone 8-hour running average stored in begin hour from 1997.
11	44201	27-Mar-2008	0.075	0.075	1	Ozone 8-hour 2008	Ozone 8-hour running average stored in begin hour from 2008.
12	81102	01-Jul-1987	150	150	2	PM10 24-hour 2006	PM10 24-hour standard. Violations include actual exceedences & expected excd's where
16	88101	17-Oct-2006	35	35	2	PM25 24-hour 2006	PM25 24-hour standard made more restrictive in 2006.
18	88101	17-Oct-2006	15	15	2	PM25 Annual 2006	PM25 annual wtd mean was reaffirmed in 2006 with same level as originally promulgated.

Data Model for AQS (Metadata)

Data Model for AQS (Summary Data)

Data Model for AQS (Measured Data)

How To Build a Query in Discoverer

- Connect to Discoverer (log on)
- Choose an Output Format
- Select Data
 - To Display
 - To Filter By (Conditions) NOT Optional
- Specify Calculations and Totals (Optional)
- Adjust the Layout (Optional)
- Specify Sorting (Optional)
- Specify Run-Time Parameters (Optional)
- Run Report

The REAL Way to Build a Query...

- FORM A GOOD QUESTION!!
- Understand the Data You Need to Answer the Question

What you need to Run Discoverer

- AQS user ID and password
- Web browser
- Java (Virtual Machine)
- URL: http://www.epa.gov/ttn/airs/airsaqs/aqsdiscover/

Let's Light This Candle

Selecting Conditions

- Go to Conditions tab
- Select New
- Select New Condition

Selecting Conditions, cont'd

Enter formula (other things optional)

- Item
- Condition
- Value
 - Type in or pull down

Tablename . Fieldname

Possible Conditions

- We're spending a lot of time on conditions they might be important!
- Possible Conditions

=	IS NULL
<> (not equ	al) IS NOT NULL
>	NOT IN
<	BETWEEN
<=	NOT BETWEEN
>=	NOT LIKE
	!= (not equal)
LIKE	LIKE '%OLORAD%' (% = *, _ = 1 char, CaSe SensiTivE)
IN	IN ('88101', '88501', '88502')

Table Layout

Sorts

🕌 Workbook Wizard - Step 4 of 5: Sort

Parameters and Results

▶ EPA Region Code	▶ State Name	▶ State Code	▶ State Abbr
04	Alabama	01	AL
04	Florida	12	FL
04	Georgia	13	GA
04	Kentucky	21	КY
04	Mississippi	28	MS
04	North Carolina	37	NC
04	South Carolina	45	SC
04	Tennessee	47	TN

Exercise 1 - Introduction

- Launch a web browser and go to Discoverer (http://www.epa.gov/ttn/airs/airsaqs)
- 2. Create your connection and Connect to aqsprod
- 3. Create a new workbook using the AQS basic business area to show all states within your EPA region
- 4. Adjust the table layout so that EPA Region is in column 1, State Abbreviation in column 2, State Name in column 3, State Code in column 4
- 5. Sort by EPA Region, then State Name. Change to a group sort on EPA Region.
- 6. Add a title
- 7. Extra Credit Create another query to list the Pollutant Standards

Exercise 1: Sample Results

Getting Data from Multiple Tables

- Once you select an item, folders that don't connect to it are grayed out (EUL in action!)
- You have to build a bridge to the items you need by selecting intermediate folders
- A "fan trap" error means you've connected items in an ambiguous way that Discoverer cannot interpret – use a different connection path

41

Notice what happens when an annual summary item is selected

Should Look Something Like This...

		Monitor ID	▶ Summ	▶ State Code	▶ County Code	▶ Site ID	▶ Parameter Code	▶ POC	▶ Dur
ľ	1	01-003-0010-44201-1	2009	01	003	0010	44201	1	W
	2	01-033-1002-44201-1	2009	01	033	1002	44201	1	W
	3	01-051-0001-44201-1	2009	01	051	0001	44201	1	W
	4	01-055-0011-44201-1	2009	01	055	0011	44201	1	W
	5	01-069-0004-44201-1	2009	01	069	0004	44201	1	W
	6	01-073-1010-44201-1	2009	01	073	1010	44201	1	W
	7	01-073-2006-44201-1	2009	01	073	2006	44201	1	W
	8	01-073-6002-44201-1	2009	01	073	6002	44201	1	W
	9	01-073-1003-44201-1	2009	01	073	1003	44201	1	W
	10	01-073-1005-44201-1	2009	01	073	1005	44201	1	W
	11	01-073-1009-44201-1	2009	01	073	1009	44201	1	W
	12	01-073-5002-44201-1	2009	01	073	5002	44201	1	W
P		(1				

Build a Bridge to Another Table

- Now, add the county population
 - Via states?
 - Monitor has state, states has counties...
 - Did it work?
 - Via ???
- Fan traps are caused by how the data tables (and EUL) are organized, not how physical reality is organized

Calculations and Totals

- Add some math
 - Observations per person
 - Mean of annual means
- Calculations operate on columns
 - Generally an operator: + * / ||
 - Example: (0.5 * ALT_MDL) SAMPLE_VALUE
 - PARAMETER_CODE || ' (' || PARAMETER_DESC || ')'
 - Adds a new column
- Totals operate on rows
 - Generally a function: min, max, sum, avg, stddev, count, etc.
 - Example: MIN(OBS_PERCENT)
 - Adds a new row
- Can also be done by exporting

Calculation and Total Example

Arithmetic Mean (Annual)	County Population	▶ Obs per capita
.03671	662047	0.01
.03895	662047	0.01
.03951	223510	0.03
.03921	49756	0.12
.03353	14798	0.39
.03706	88787	0.06
.04371	276700	0.03
.03952	399843	0.01
.03913	399843	0.01
.04102	111064	0.05
.03998	143293	0.04
.03219	164875	0.03
.03769	140415	0.04
Average: .03869		

Exercise 3 – Data from Multiple Tables

- Repeat the lecture example (except for county population items) selecting data from more than one table – explore the data related to the annual summary data
- Items
 - Monitors Table: state, county, site, parameter, POC
 - Annual Summary Table: monitor, year, PS, duration, EDT, mean, obs
- Conditions
 - State = 01
 - Parameter = 44201
 - Year = 2008
 - DEP = W, (0,2), 11
- Sort

46

- County
- POC

Extra Credit: Add some totals or calculations

Crosstabs (Pivot Tables)

- Normal tables have selected items across the top
- Crosstabs have items across the top and items down the side
 - Values are shown in the grid
 - Some kind of aggregate (sum, count, etc.) if necessary
- Page Items are also useful for filtering data

Crosstab Example

Page Items: 🖉 Paramete	er Code: (38101 🔻	🕺 Durati	on Code:	7 🔻 🕺	Exception	al Data Type ID	: 0 🔻 🕅	Pollutant	Standard lo	± 16
	Count of	Observa	tions (An	inual)

Building the Crosstab Workbook

Exercise 4 – Crosstab with Graph

- Open a new worksheet and select a crosstab query
- Query Raw Data Current data for :
 - site 39-035-0060
 - Year = 2008
 - Parameters in 88101, 88502
- Move
 - Date to right side
 - Monitor ID to top
 - Standard Sample value into grid
 - All else into Page Items
- Finish
- From Page Items: All params and POCs
- Edit Graph format to line
- Optional: conditionally format all samples over 35 with red background

Exercise 4 – How To

Exercise 4 – Crosstab with Graph

Hints, Tips and Other Good Stuff

- Discoverer is accessing the live database (same as the AQS application)
- Your Discoverer ID and password are the same as your AQS ID and password
- Only registered AQS users can access the AQS database via Discoverer
- If you delete your cookies, you'll have to recreate your connection
- Your Connection must be created on each different PC you use
- There is one EUL for AQS; and multiple Business Areas
- AQS basic has the most commonly used tables
- AQSprod includes all the tables in AQS basic plus "raw data current" and a few other related tables
- Any workbook you share with others will have your userid appended to the beginning of the workbook name
- You can get to Discoverer from the AQS Web Application link on the EPA TTN AQS page - <u>http://www.epa.gov/ttn/airs/airsaqs/</u>
- Many of the reference tables are viewable from
 <u>http://www.epa.gov/ttn/airs/airsaqs/manuals/codedescs.htm</u>

More Hints, Tips, and Good Stuff

- Selection has search function (flashlight icon)
- Max time for Discoverer queries = 60 mins
- Max number of rows= 65,000
- Many of the date fields are defined as YYYYMonDD HH:MM e.g., 2005Jun11 01:22. Many date fields are also defined for just the YYYY, or Q, Mon, or DD, or HH, or MM
- Filter builder has auto-format
- Online Help is pretty good
- If you can't get a total to work within Discoverer, you may want to export to a spreadsheet to create your totals (and other calculations)
- You can change the directory for exported worksheets:
 - File | Export... (use wizard instead of shortcut)
- Oracle Technology Network is a good source for information free registration look for Discoverer with Data Warehousing and Business Intelligence

(http://www.oracle.com/technology/products/discoverer/index.html)

There's lots to do! Discover the data with **DISCOVERER**!

You are now a **DISCOVERERER**?

Appendix: Syllabus for Class

- AQS Database basics
- Starting Discoverer
- Basic query
- Grouping data
- Queries with multiple tables
- Editing an existing query
- Calculations / Totals

- Saving queries
- Sharing queries
- Exporting data
- Getting Help
- Refreshing data
- Crosstab queries
- Graphs

Appendix: Key Terminology

Interface to database Grouping of Tables Group of worksheets = Workbook

= End User Layer (EUL) = Business Area

Tables	II	Folders
