Subject AQS Software Changes

AQS User,

The following two software changes have been implemented in AQS:

- 1) Reports that you choose to be delivered via Email (as opposed to CDX), are now being sent by the user "Internet Deamon Owner" instead of Report_User.
- 2) Batch Load job logs are now being emailed by the user "Oracle Database Owner" instead of the end user.

A couple of reminders:

- 1) Don't forget to register for the AQS Conference (if you haven't already). This year's conference is being held in San Diego, June 13-17, 2005. Please visit our conference web page for all the details and the registration form.

(<http://www.epa.gov/ttn/airs/airsaqs/conference/AQS2005/aqs2005-preconf.htm>)

- 2) If your email address should change, please remember to log into AQS and update your email address within your user profile. You can find your email address, along with your other profile information, under the Admin, Security tab.

Thanks.....

.
