Subject: Raw Data Update Status

Registered AQS Users,

On July 18, 2002, all users were notified that raw data updates for 1992 to 1997 data would be stopped on August 2 so that the split of the data into a separate read only table could begin. In order to allow users time to complete data updates and to allow for additional testing before beginning the split, the 1992 to 1997 raw data will be available for update through August 16, 2002. The split process will be done one year at a time beginning with 1992 and moving forward. The oldest year will be removed from access for updates and moved to the read only table.

This schedule also applies to Regional Office processing of concurrence for exceptional event flags for these years.

Please contact me if you have any questions.

Thanks,  
Jake Summers
