These modifications address several different areas:

- The implementation of Core-Based Statistical Area (CBSA) and combined Statistical Area (CSA)
- The correction of miscellaneous software, including the login form, Quick Look report, Maintain Monitor, and Quick Look PM2.5 work file format.

The documentation for these modifications is the "Software Release Notes for September 27, 2008" which can be found on the AQS website under "Manuals and Guides."
