Notes:

1. Quarterly sampling frequency (Q1-Q4 Freq.) was derived from the reported data as MODE[days between samples]. If MODE was not equal 1 or 3, Freq was set to 6. Only 1 Freq. was assigned per Quarter.
2. If 'All 4 Q complete' = 1, then all 4 Quarters are 75% or more complete.
3. If 'First 3 Q complete' = 1, then the first 3 Quarters are 75% or more complete.
4. ' # of Q w/ data' is the number of Quarters with valid data reported.
5. Please contact Mark Schmidt (919-541-2416) if you have any questions regarding this Table.
