Subject: Meeting to discuss Improved Condensable PM test method.

Condensable Particulate Matter Test Method Improvement Stakeholders:

This is a short note to advise you that I have selected February 9, 2007 to have a face to face meeting of all the stakeholders to discuss our progress, the results of our laboratory study and commitments to extend the investigation by stakeholders external to EPA. As with the last meeting, the location will be at EPA's offices in Research Triangle Park, NC. I will arrange a teleconference line for those individuals that are unable to travel to be with us in person. I plan to start the meeting at 9:00 am with an unstructured mixer where coffee and breakfast snack will be provided. For those wishing a more substantial fare, you can purchase an excellent breakfast at EPA's cafeteria which is adjacent to our meeting room. The more structured part of the meeting will begin about 9:30 and continue to 3:00 in the afternoon. For your travel arrangements I have attached links to the Raleigh Durham Airport and a listing of hotels near our office. If you need additional information to arrange your travel, please contact me and I will try to help you. I will send you more details of the meeting in a few weeks.
